

### Merino & Jumbuck, Brunswick East

Since installing a 54kW solar system, Merino & Jumbuck often generate more electricity from their solar panels than they consume from the grid. This will save the company thousands of dollars in operating costs each year.

### Genovese Coffee, Coburg

Since installing a 60kW system Genovese Coffee have reduced their grid electricity consumption by around 60 per cent across the year, and up to 80 per cent in summer. At that rate, they expect the solar power system to have paid for itself in less than five years.

### Conga Foods, Coburg North

Positive Charge helped Conga Foods install a 458kW solar system. This is expected to reduce their grid energy consumption by over 40%, which will save the company over 700 tonnes of greenhouse gas emissions and thousands of dollars in operating costs each year.

### Otto and Spike, Brunswick East

Positive Charge helped Otto and Spike install a 30kW solar system, which is expected to pay for itself in under four years. The installation was funded through a loan via Moreland Council, enabling Otto and Spike to start saving from day one.

## Five reasons to go solar now:

- » Increase your profit
- » Future proof your business against energy prices
- » Get a return on your energy costs
- » Don't miss out on the government rebates for installing solar.
- » Do the right thing for the planet by generating clean, renewable energy
